**A feature documentary will be released at a premiere event in Piccadilly Circus, London on Thursday 8<sup>th</sup> February, 2018.**

*Voices of the Silenced: Experts, Evidences and Ideologies*, was filmed over two years in eight countries. It promotes the stories of fifteen individuals coming out of homosexual practices. With the support of a range of international and UK experts specialising in the care of this marginalised population group, *Voices of the Silenced* challenges the closedown on debate about the value of therapeutic support undertaken in ways that are respectful of client goals and individual rights to change.

Invited media representatives are welcome to receive complimentary tickets for the event, which starts at 6.45 pm, on request (details below).

Exposing the largely unexamined role of sexual politics and the ideological basis of renewed calls for banning therapies in some western nations, the film examines the ancient ideologies of sexuality in the Greco-Roman world, the historical influence of sexual ethics from the Judeo-Christian world and the re-emergence of pansexual humanist values in the modern era.

The film is released by Core Issues Trust, the UK's only registered charity offering therapeutic support for those with unwanted homosexual feelings, in association with a range of like-minded groups from other parts of the world. It features almost 40 participants from English, German, Hungarian and Norwegian language groups. The English film will shortly be released for online download and in DVD format with closed or open subtitling in German, Slovakian, Russian, Polish, Italian, Mandarin, Korean, Hungarian, French, Spanish, Ukrainian, and Arabic.
